

# MAKE A MIGHTY METEOR

How to craft your own homemade meteor just like the ones the pups are facing in *PAW Patrol: The Mighty Movie*!

MAKE WITH PARENTAL GUIDANCE

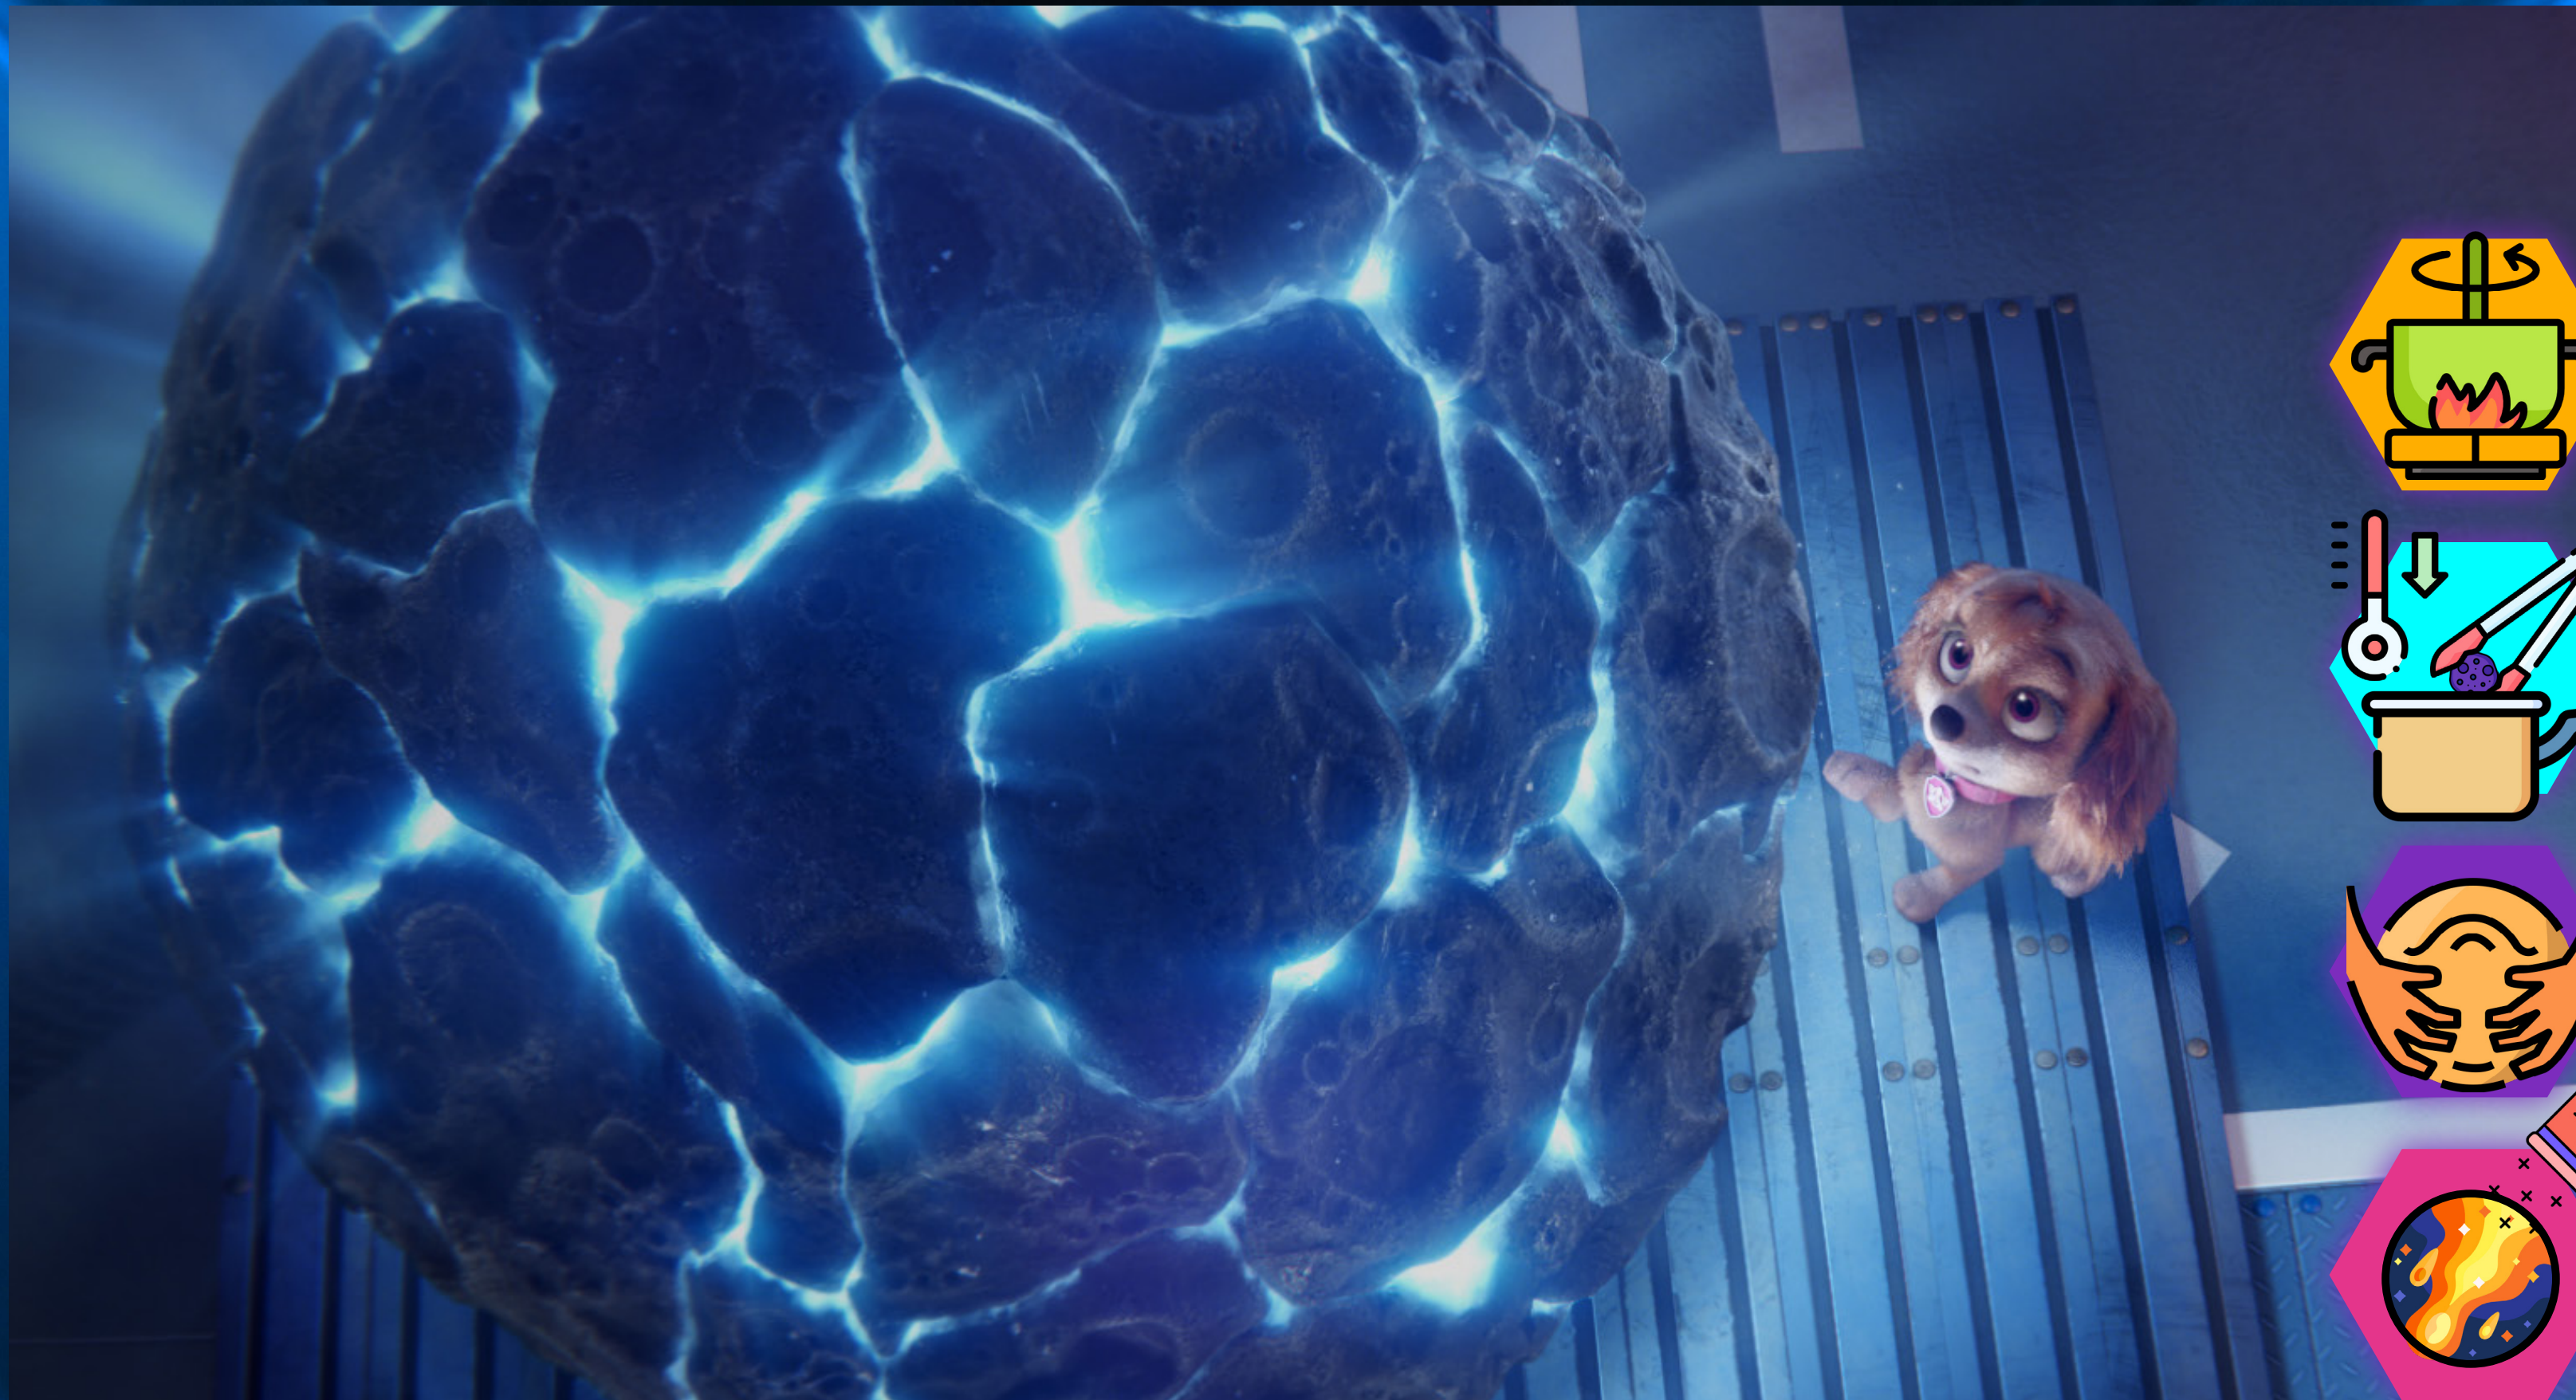

In *PAW Patrol: The Mighty Movie*, the residents of Adventure City and the pups who protect it face their biggest threat yet. And we're not just talking about a Godzilla-sized Mayor Humdinger stomping through their streets!

In their epic second big screen adventure, Ryder's team of heroic pups must save the city from a deadly meteor storm – and the mad scientist trying to steal the superpowered crystals lurking inside these incoming intergalactic rocks.

Here's how you can craft your own play-dough-style mighty meteor, to recreate the thrilling battle at home. Just make sure you get a parent to help you!

## Ingredients (for each colour of play-dough you want to use):

1 cup water  
1 cup flour  
½ cup salt  
1 tsp cream of tartar  
1 tbsp vegetable oil  
Food colouring and glitter (pick your own favourite colours and glitters!)

## DIRECTIONS

1. Stir all the ingredients – apart from the glitter – together in a saucepan on a medium heat, until the play-dough mixture thickens.
2. Carefully take your thickened play-dough-style mixture out of the pan and cool on the counter.
3. When the play-dough mixture has cooled, mix all your different colours together by hand into a stunning marbled effect, then mould the finished dough into a meteor-shaped ball.
4. Pour your glitter onto a plate in multi-coloured streaks, then roll your meteor over it, covering it with a sparkly, space-like skin. You now have a mighty meteor for your own PAW Patrol pups to face off with at home!
